Q: 9 workers on a line and a dart in the one hand. Divide the line into segments and order them. 9 workers on a line and a dart in the one hand. Divide the line into segments and order them. How many ways can this be done? I know I need to count how many ways there are from a dart to get back to the dart. How do I do it? A: First, order the 9 workers, giving a total of $9!$ ways. Each worker can be between 1 and 9 positions away from the dart, and all 9 positions on the line are equally probable. Once you have the order of the 9 workers, the order of the 9 positions they occupy is given by first ordering all 9 workers, then ordering the remaining 9 positions. You can choose an order for the 9 workers in $9! \cdot 9!$ ways, but the order for the 9 positions is given by choosing one of the $9!$ ways of ordering the remaining 9 positions. Hence, the total number of ways of ordering the 9 positions is $$9! \cdot 9! = 9!^2$$ 2008 Win-Tron 400 The 2008 Win-Tron 400 was the eighth and penultimate round of the 2008 V8 Supercar season. SALES TERMS 4K UHD (Ultra-high definition) The contents of this release will be available in 4K UHD (Ultra-high definition) at launch. As 4K UHD has larger image data than 1080p, the ratio of the image data for 4K UHD relative to that of 1080p is larger (about 9 times) than that of the Blu-ray (BD). In addition, the image data is compressed in 4K UHD unlike in the Blu-ray, and the potential of compression breaks up fine details more than in the case of the Blu-ray. Accordingly, the level of image quality obtained in 4K UHD is dramatically superior to that of the Blu-ray. 1080p (Full HD) The contents of this release will be available in 1080p (full HD) at launch. const mp = require("hyperapp") const app = new mp.App() const client = new ObjectMapper() client.register(mp.getSchema(process.env.REACT_APP_JOB_SCHEMA)) app.get("/", (req, res) => res.send(client.dump(client.createFd(req)))) app.listen(3000) PS: You can find this file in hyperapp version 2.3.0 A: It is because ObjectMapper uses typeof(object) in this case to check the type of the argument and the default is function so you should use argument.constructor.name to get the class name which is Ctor instead of Fct object. You can replace if with condition or just use some filter method in the middle of the code that check arguments type and converts them into objects if they are objects and just carry on if they are not. Like so: mp.getSchema(process.env.REACT_APP_JOB_SCHEMA) .filter((data) =>![Function, ProcessStream, FileSystem, http, Transport, EventEmitter].includes(typeof data) && (data.constructor instanceof Object)) .forEach((data) => { const obj = client.dump(data) res.send(obj) }) Hope it helps! Q: Enable/ Disable c# compile options on build I have written a templated control that I'm using across a good number of projects. I can't find a way to toggle the compile options on the control. I'd like to disable settings I don't need, but when I do, I end up with code error messages that seem out of place. A: If you're using Visual Studio, you may want to create a post-build script (plain text) to wrap up your building process. This is called a.Post-Build-Event in Visual Studio, and will take some XML syntax. The default targets already comes with an implicit.Post-Build-Event, so you only need to add what you want to process. PreserveNewest 'I don't think I've ever seen a more self-absorbed character,' says actor Peter Graves on Ned Beatty in 'Ned and Sam' Peter Graves, seen here as Ned Beatty in the TV series "Ned and Sam," has been cast as a key figure in "The Hitcher," a thriller starring none other than Ned Beatty. The tale involves a couple traveling in a remote area along a road when they are waylaid by a mysterious hitchhiker (Beatty) who threatens their lives and forces them into the back of his van. The rider claims he's on his way to a funeral and gradually beats them with a length of pipe. After they escape, the couple (Beatty and Virginia Madsen) go in search of help in a town that is in the grip of a killer. But that's when the real mayhem begins. Overnight, Graves was added to the cast and playing a far more prominent role than just running into or assisting Beatty. And that's about the only role he has. He isn't a significant character. The actor, who has starred in such series as "It's a Man's World
