(INS_Imagenomic_Portraiture_V23.cpp:1093) As it seems to be returning NULL values and I have no idea why the problem is being caused. Can anyone help, and explain the error to me?

Thanks. A: I think I have figured it out. I need to access the node (layer) that these boxes are displayed on and then call a drawbox method on them. This returns a rendered image that I then use to loop through each box to get their heights and widths. This image is then stitched together to form a single image that is the final product. The present invention relates to a semiconductor device and a method for fabricating a semiconductor device, and more particularly relates to an epitaxial layer manufacturing method

and a semiconductor device having a silicon carbide (SiC) substrate containing a silicon nitride (SiN) film. With respect to semiconductor devices, SiC substrates have attracted attention as next generation substrates for replacing silicon substrates. SiC substrates have superior physical properties such as a wide band gap, high breakdown voltage, high resistance to irradiation
