FastReport: Free was designed to produce professional-looking reports with no programming, and the .Ludwig von Busch Ludwig Friedrich Karl Ludwig von Busch (26 February 1768 - 27 October 1848) was a German mineralogist. Biography He was born in Rheydt (Hochsauerlandkreis), Prussia (Germany). He studied at the University of Halle and at the University of Göttingen. He visited mines in England and the United States, and settled in Berlin in 1794, where he devoted himself for twenty-one years to the study of mineralogy. In the preface to his edition of Fries's first edition of Johann von Lindwurm's *Minuten der Schmierstoffe*, he states that he has collected all the mineralogical catalogues, published by the French, English and American mineralogists; and has personally visited all the mines in the United States, in Great Britain, and in all parts of Germany. His book *Minuten der Schmierstoffe* (1814) was the first complete work of mineralogy published in Germany. The English translation appeared shortly afterwards. The numerous works of Busch's accomplished friend, J.G. Klaproth, containing many beautiful designs, are also noted. On 10 February 1810, Busch was elected professor of mineralogy at the University of Berlin, and in 1814 he took the chair of mineralogy and chemistry at the Königsberg Academy of Science. In 1825, he became an honorary member of the Royal Society of London. On 12 January 1824, he married Marie Elisabeth Gräfin von Syrstad (1780 - 1845). He died in Berlin. The mineral lechstenite or "Buschite" was named in his honor in 1842.
