Guarantee on used or refurbished phones.Q: Rails 4 routing conflict with named routes, but not with root path I have an app that already works. I just got to the point where I decided to add a custom named route. It doesn't work, but not for the reason you might think. Here is what is actually going on: When I visit the URL /menu/a I get the correct 200 response. When I visit /menu/b I get a 404. It's like the routes are conflicting, but I can't see why. Here is the route: match "menu 6d1f23a050
