Comment from : Alexander Podorozhny This is not only among people, but also in the animal world, there is such a sign that a dog that does not bark, but growls like a wild wolf, dies more often. Comment by : Alexander Gibson Hello! I have a question: How can I check that my dog, which is already 17 years old, is not a carrier of piroplasmosis? The fact is that after each walk the dog begins to shake and sneeze (as if from a strong cold, although it is very warm outside). However, the body temperature is normal.
