I have already posted few other Proteus Arduino Libraries on my blog but those were third party Libraries and has nothing to do with us. We were sharing them just for the sake of knowledge but today I am going to share our very own Arduino library for Proteus, designed by our team after a lot of hard work. We have tested all the boards with different types of sensors. So, now you can easily use Arduino in Proteus and can simulate any kind of project. If you got any trouble then you can ask in comments or can use our forum to post your questions.
