I just used google to see if anyone was actually using these sites and lo and behold there are over 600,000 users.

some of the payments made to these services are collected by the affiliate. if the service can not send the payment to you after you have paid, you can click on the link from the site to see the payment details. money robot submitter allows you to choose a list of sites that you want your robot to track your affiliate offers. the sites that you choose will be a double-entry system and have a similar offer in the same paypal, so you can remove the double entry and you send an email to report that the offer is paid. money robot submitter allows you to create a single feed, or many, whichever you prefer. it creates a single feed (of sites) which means that your robot will do all the work to submit links automatically, analyze and schedule them (workflow mode), read them (goal mode), publish them, and submit them. #include "sds2.h" #include #include #include int main(int argc, char *argv[]) { char filename[128]; if(argc!= 2) { printf("%s ", "usage: sds2downloadcrack20 file"); exit(1); } if(strlen(argv[1]) > 100) { printf("%s ", "only very small files allowed (less than 100 k)"); exit(1); } strcpy(filename,
